Office Action Summary	Application No. 10/673,315	Applicant(s) FRINGELI ET AL.	
	Examiner Randy W. Gibson	Art Unit 2841	

-- Th MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Germany on March 29, 2001. However, there are no copies of the intervening PCT application papers anywhere in the US application.

Information Disclosure Statement

2. The information disclosure statement filed February 26, 2004 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ober et al (US # 4,632,199) in view of Youg (US # 6,088,021). Ober et al shows a scale that has a detachable keyboard/display unit, in at least one embodiment (Col. 2,

lines 54-66). Ober et al discloses the claimed invention except for the retractable cord. However, it is well known to place retractable cords into the housing of peripheral devices as shown by the example of Yong (Col. 7, lines 35-52). It would have been obvious to the ordinary practitioner to place a retractable cord in the device of Ober et al, as suggested by Yong, to prevent excess lengths of cord from laying about thereby entangling other cords or devices.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Montagnino shows a scale with retractable cords. Dardat et al, Gietenburch et al, and Lüchinger et al show scales with movable keyboards. Burke and Wagner show typical cord retraction units.
